### ABSTRACT

*Context.* Describe context.

*Aims.* Describe aims.

*Methods.* Describe methods.

*Results.* Describe results.

*Conclusions.* Describe conclusions.

**Key words.** some key words

**Table 1.** Caption for table below

HJD	<i>E</i>	Method#2	Method#3
1	50	−837	970
2	47	877	230
3	31	25	415
4	35	144	2356
5	45	300	556

## 1. Various simple examples

### 1.1. Citations

The easiest way is to put your bibliography in a separate .bib file, containing BibTeX-formatted entries (here in the biblio.bib file).

Then you cite this paper (Refsdal 1964) as the work of Refsdal (1964). You can also put extra words in the parenthesis before (like in Refsdal 1964), or after (Refsdal 1964, for instance), or both (see Refsdal 1964, for details).

### 1.2. Equations

A simple formula is given by Eq. 1.

$$(\beta_1, \beta_2) = \theta - \alpha(\theta_1, \theta_2) . \quad (1)$$

### 1.3. Figures

See Figs. 1 and 2 for how to incorporate figures in this LaTeX document.

### 1.4. Tables

Have a look to Table 1 for a simple table example.

### 1.5. Lists

1. item 1
2. item 2

- item 1
- item 2

## 2. Conclusion

And voila.

*Acknowledgements.* I would like to thank...
